Secret Method To Make \$100's Fast Exposed™

I've outlined the strategy step by step. You can make more money than I did with this technique. And I tell you how and why!

So here is what you need to make this work.

- 1) A blogger blog.
- 2) The blog must have a pagerank of 4 or higher. That is the pagerank of my blog at the time of testing this technique. It means you can have a pagerank 3 or 2 and this still works. This is not **WINDOWS**, like if there is a simple error the computer will **FREEZE**.
- 3) Optional: If you already have a ton of traffic coming to your blog it obviously helps.
- 4) Finding an affiliate product.
- 5) Finding a hot keyword (just one).
- 6) The tactic. Of course you have to wait and painfully struggle till I arrive there... :)

The tactic works... you simple need to create a new blog post and add something... that was a bit more pain if you are curious :)

Now let's get started to see how to put in more money in your pockets.

Pick up an affiliate product. A decent product and program where you get paid good commission and the site is awesome.

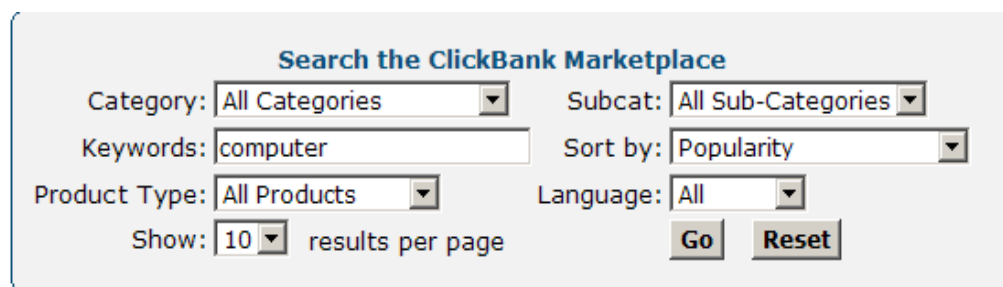

Secret Method To Make \$100's Fast Exposed™

Visit <http://www.clickbank.com/marketplace.htm> (the one I use), <http://www.paydotcom.com> or <http://www.cj.com>. It does not matter where you go.

In the real example which I will be mentioning all the time I chose Satellite for PC product. This is a software that allows you to watch TV on your PC. It was a hot product on Clickbank that is why I chose it.

By hot I mean, if you go to Clickbank Marketplace and search for products and then sort them by popularity this was the TOP product.

Here is a screenshot of the clickbank marketplace displaying products sorted by popularity. All I did was enter the keyword computer (to find products related to computers) and then sort them by Popularity.

1) Easy Photography Business - Digital Camera - Make Money!

Genuine Home Business Opportunity Lets You Earn \$200+ Per Day Taking Simple Digital Photos Of Real Estate, Cars, Trucks, Boats, Etc. In Your Local Area! Computer, Internet Access And Digital Camera Required. Huge, Virtually Unknown Nationwide Industry!
\$/sale: \$16.60 | Future \$: - | Total \$/sale: \$16.60 | %/sale: 50.0%
| %refd: 40.0% | grav: 39.44
[view pitch page](#) | [create hoplink](#)

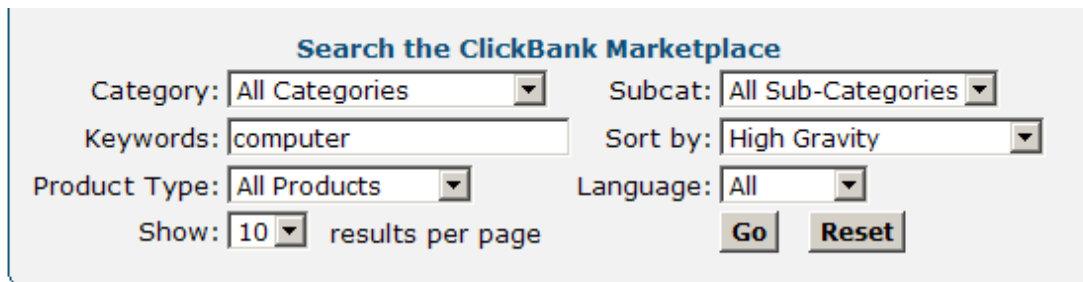

2) The 12 Month Internet Millionaire. The Amazing Money-Making Secret Of A 28-year-old Convicted Felon Who Earns More Money Per Year Than The CEOs Of FedEx, eBay(R), Amazon, Time Warner, Apple Computer, McDonalds, Microsoft, Nike, Yahoo, Ford Motor Company, General Motors, And Goodyear Combined!

\$/sale: \$66.47 | Future \$: - | Total \$/sale: \$66.47 | %/sale: 75.0%

You can also search by gravity in Clickbank. The top products you see after this search are the ones that affiliates have been making the most money with.

Secret Method To Make \$100's Fast Exposed™

Here is again a screenshot showing this in action:

Search the ClickBank Marketplace

Category: All Categories Subcat: All Sub-Categories

Keywords: computer Sort by: High Gravity

Product Type: All Products Language: All

Show: 10 results per page Go Reset

1) Easy Photography Business - Digital Camera - Make Money!

Genuine Home Business Opportunity Lets You Earn \$200+ Per Day Taking Simple Digital Photos Of Real Estate, Cars, Trucks, Boats, Etc. In Your Local Area! Computer, Internet Access And Digital Camera Required. Huge, Virtually Unknown Nationwide Industry!

\$/sale: \$16.60 | Future \$: - | Total \$/sale: \$16.60 | %/sale: 50.0%
| %refd: 40.0% | grav: 39.44

[view pitch page](#) | [create hoplink](#)

2) New* Fast Pc Secrets - Eliminate Slow Computer Problems 13

Vids. Computer Running Slow? Learn How To Double Your Computer Speed, Eliminate Crashes And Freeze-Ups. Remove Spyware, Adware, Viruses & Clean Up Your Registry. Multimedia Course With 13 Videos & 13 PDFs, 2 Bonus Vids. Go To - www.FastPcSecrets.com/affiliates.

Bottom line is...

A decent product! Products that do not sell, no matter what technique you use it will be hard... (It does not have to be computer related product)

Second step is doing keyword research. This should be done well. The better you do it the better are the keywords you will find. Sometimes I find hidden gems by doing really good research.

But you need ONE keyword only.

Any keyword research tool works, like for example the free wordtracker tools at: <http://freekeywords.wordtracker.com>

Or just use any one you prefer. You can visit Google and search for plenty of them... a paid keyword tool will provide better results but optional.

Secret Method To Make \$100's Fast Exposed™

Next input a keyword related to the affiliate product you are going to sell. Nothing difficult here... but you need to find a keyword with less than a million competitors.

You are going to focus on Google only for this. Means check competition number in Google.com The Keyword Enhancer tool displays just that.

The less number of competitors the better. The keyword I chose at the time was: Watch Satellite Tv On PC. It has 385,000 competition and gets 15 daily visitors.

Now I have the keyword Satellite Tv On Pc which currently ranks number 6 in Google. It has 68,000 competition and gets 17 daily visitors.

This means, the "special" blog post I created ranks number 6 for that particular keyword. 17 visits is few, but I can create unlimited number of these blog posts.

You can easily change the keyword if it does not work. But remember search for the keyword manually in Google, check if there are CNN, youtube or some other giant ... You can still choose that keyword but you won't get the number one position probably.

When choosing the keyword remember to find a keyword that makes sense. By this I mean, if your keyword is red cars... probably you will make a big rounded \$0.

But if you find buy computer car games then you will make a lot.

See what I mean... the customers are looking for what you are selling.

You will **not need** to get backlinks... I won't tell you to start doing link building. No need, but if you want you obviously can...

You are choosing a simple keyword, with few competition so that the blog post you will create will rank fast with NO need of getting backlinks towards it.

Why?

- Blogger blogs are ranked as fast as hell.
- If you have a high pagerank already, it means your site already has a lot of backlinks... means authority and your blog posts (like mine did) ranks fast for a low competitive keyword.

Secret Method To Make \$100's Fast Exposed™

- You are going to do minor changes known as onpage optimization but highly effective... in a minute I tell you more about that.

Third step...

The blog post!

Login to blogger blog... and create a new blog post. You need to get yourself familiar with the product you are selling. The more the better. This means know the benefits and other important things like that to convert traffic into sales!

But relax because I let you (in fact this is what you should do) rip off the exact copy I used.

The technique is to use the exact format of copy... you just change the words to suit the product you are selling. But change nothing else. Where there is bold make bold, where there is red font make it red... where there is image put image.

Secret Method To Make \$100's Fast Exposed™

Here is the copy you need to put on the new blog post (and then edit it). Note that the format is that it sort of recommends a product. As if you bought it (if you did better) and you are saying two or three good words about it. Not selling – but recommending.

Satellite Tv On Pc

There are many Satellites for PC available online but none, that I know of, has the same features and huge number of stations as SatelliteSoft's, "SATELLITE TV for PC". SatelliteSoft, a Market Leader, has done their homework.

They want to over deliver by creating an amazing software with over 3000 Stations and 40 music channels. They included the most wanted worldwide channels and removed any monthly or high priced fees. They tried just about everything to make this

really entertaining and useful.

They give access to stations of different countries and regions and made their stations available in multiple languages.

SatelliteSoft created a **"Complete" Package:**

- * **More Than 3000 Stations**
- * **TV In Multiple Languages**
- * **TV Channels Of Different Countries/Regions**
- * **Available Worldwide**
- * **No Extra TV Or Hardware Required**
- * **Access To Live Shows**
- * **Radio And TV Stations**

Secret Method To Make \$100's Fast Exposed™

* No Monthly Or High Fees

They created the software in such a way that anyone can start using it. It works with just an Internet Connection and a PC. Even a slow Internet connection is OK, even though the faster your connection the better. There is no need to buy any new equipment or learn any new technology. They added some other **bonuses** as well for **free**.

The software requires no other payments, fees, hidden costs or monthly high priced fees. They have 3 versions, the Titanium, Elite and Pro versions. The only difference is the number of stations each one has. Titanium has the most number of stations and the Pro with some 2800 stations the least.

As a direct result of downloading, "SATELLITE TV for PC," I am really satisfied with all these benefits. This is definitely a "Must Have." The price is very reasonable. You can download this software for Windows (95, 98, NT, ME, 2000, XP) with about 3 free gifts for only \$49.95 USD or \$56.12 Canadian. If you download this software, it's like having an extra TV.

Download [SATELLITE TV for PC](#) and see what other people have to say.

Satellite Tv On Pc

Here is the link to the blog post:

<http://www.deletespyware-adware.com/blog/2007/04/watch-satellite-tv-on-pc.html>

Not only the font styles, etc... but even the language should be as identical as possible. Example: At bottom, mention price in USD and Canadian.

NOTE: The image should not be the product image, but a screenshot of the website. There are many free screenshot tools you can use like [Super Screen Capture](#). That's at: <http://www.free-screen-capture.com>

This software does make screenshots for free but then adds a URL on the image. Relax, just open an image editor you have on your computer.

This can be paint shop pro, paint brush or whatever you have.

Secret Method To Make \$100's Fast Exposed™

Then edit a bit image to remove that link. Keep the image the same size you see it on my blog.

Your affiliate link should be placed at the bottom of course where you see the link. But also inside the image itself.

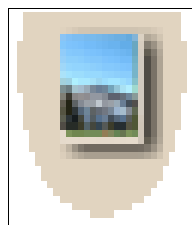

Sounds great isn't it?

How to upload image and link to it?

First click on create new blog post.

Then you see several icons that will allow you to do many things. One icon you need to click looks like this:

When you click that... this window opens:

Secret Method To Make \$100's Fast Exposed™

URL

We accept jpg, gif, bmp and png images, 8 MB maximum size [Learn more](#) about using web images

Choose a layout.

None Left Center Right

Image size:
 Small
 Medium
 Large

Use this layout every time?

First click on Browse and locate the saved image. The screenshot of the website. Then click on upload. That's all, no other changes.

In blogger blog post you will have something like this when you upload an image:

```
<a onblur="try {parent.deselectBloggerImageGracefully();} catch(e) {}" href="http://www.deletespyware-adware.com/blog/uploaded_images/siteshot-724091.jpg"></a>
```

Secret Method To Make \$100's Fast Exposed™

Replace the bloded url, **http://www.deletespyware-adware.com/blog/uploaded_images/siteshot-724091.jpg**

with your affiliate link. Then test, by clicking on the imge... it should take you to the affiliate site.

You can also get a software like Affiliate Profit Guard from <http://www.affiliateprofitguard.com> so you host the affiliate link on your website. That software allows you to promote <http://www.domain.com> or <http://www.domain.com/productname> or <http://www.domain.com/productname.html>

Instead of your affilaite link. Dead-boring-easy to use software!

You can see in bold my keyword in the special blog post: **Satellite Tv On Pc** That is the keyword I want the blog post to rank. So put your keyword at the very beginning of your blog post. Then put it again at the very end. Both in bold.

The title of the blog post should also be the keyword.

If they keyword you chose makes no sense like **red cars** – you can add something to it like... Buy red cars. But leave just the keyword if possible... the less you add the better.

Once the blog post is ready, publish of course and then ping your blog. You can use any service to ping. Just ping once using one service only!

<http://www.pingomatic.com>
<http://www.pingoat.com>
<http://freeblogping.com>
<http://feedshark.brainbliss.com>

You do not need to leave the blog post on your blog hompeage. In my experience the blog post itself got the high rankings... not the blog.

Testing if this works is what you should then do. After 3-5 days google the keyword and check if your blog post is ranked on page one... or number one. If it is you should be making money...

If still not ranked, wait a 1-2 days more... if still nothing then find another keyword... check out the websites on the 1st page.

Secret Method To Make \$100's Fast Exposed™

Make sure they are not all big strong companies with websites over pagerank 5.

I changed my keyword three times but now the blog post ranks for more than one keyword on 1st page in Google. I keep earning money without doing anything.

As time passes it gets better, people start commenting, pagerank of blog increases... so stick with it.

You got this special report for free. Just put in this technique once... test it... and keep it... Do not delete it! Keep it there, keep testing new keywords... and there is no need to change keyword every day. Maybe the keyword requires more than 5 days for the blog post to get on 1st page.

You can also easily promote another product... by putting the technique again on the same blog... I have about 4 blog post like these... 2 keep making money. One rarely does... but if I tweak them a bit, which I rarely do... like changing the keywords then I make money from them too.

Here are my other blog posts with this technique:

<http://www.deletespyware-adware.com/blog/2007/06/computer-printer-ink-cartridge.html>

<http://www.deletespyware-adware.com/blog/2008/04/2020-vision.html>

<http://www.deletespyware-adware.com/blog/2007/05/burning-crusade-guide-official-strategy.html>

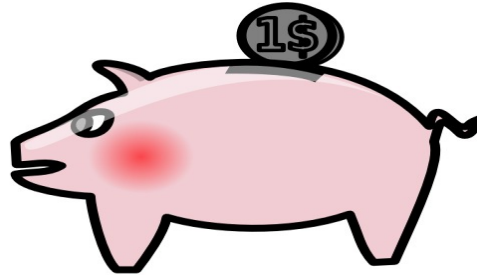

All these blog post need is traffic. I use search engine traffic, it is targetted so I only recommend Google. I did not try PPC so I won't go into that. This was a fun project I tried and it worked perfectly with little work. In fact I added this technique on my new blog too.

But the bottom line is this...

- A good affiliate product.
- Targetted traffic.

And you make money.

Secret Method To Make \$100's Fast Exposed™

Taking action is the key. Put this on all of your blogs... or on one. But do something. Once you "get it" and know how it works... just do it. You might do it ten times better than I did – or get ten times more traffic than me.

I have to be honest. I was 100% lazy with it. Probably could have drive bit more traffic and made more money. Since this was something I did for fun actually I did not focus too much on it. I was busy at that moment on other things.
