

Play Poker Online And Get Paid For It

Welcome to this free report.

I'm about to tell you how you can make money playing online poker, but before you continue reading, I assume that you have a basic understanding of Texas Hold'em poker.

The purpose of this book is not to teach you how to *play* poker, but rather how to build an online poker bankroll for free.

If you are not familiar with the game or require a brush-up, you can download a free poker guide here: <http://www.ebooks-made-easy.com/poker>

This report relies on first time bonus offers and reload bonuses. In order to provide you with the most up-to-date information I have partnered with a great website organization called [BankrollMob](#).

BankrollMob is one of the fastest growing poker communities online. This totally free online community also provides monthly prize drawings, a poker forum where you can get poker advice and ask questions, and most importantly, provides bonus opportunities.

But let me explain first how online poker sites make a profit from hosting virtual poker tables.

Online poker rooms make money by taking a small percentage out of each poker pot. This is called the rake.

The amount of rake taken from each poker pot varies from poker site to poker site. Most sites take approximately fifty cents out of every poker pot that reaches five dollars in size.

The poker sites do not care who wins or loses, rather they are interested in having lots of players who will generate pots over five dollars.

They just want online poker players, lots of players who will generate pots over five dollars.

That's it, more players equal more profits for the online poker room.

It's that simple.

For online poker rooms to make money they need poker players - lots of players. The more poker players at the online poker tables, the more pots generated and the higher the rake.

So how do these online poker rooms attract and entice new players?

Most online poker rooms offer a welcome bonus to new players. The purpose of the bonus offers are to provide the new player with the opportunity to get a feel for the games, while playing for real money without too much initial risk.

Poker sites call these welcome bonuses free money but of course they come with terms and conditions. It is very important that you carefully read these terms and make sure that you completely understand them in order to avoid surprises down the road.

You have to play a certain amount of raked pots before the bonus cash can be withdrawn.

(Wagering requirements vary from poker room to poker room so please read the bonus terms and conditions carefully BEFORE making a deposit into an online poker site.)

For example: You have a \$100 dollar poker bankroll.

One online poker site is offering a 20% first time depositor bonus. The release requirement states you must play five times the amount of the bonus in raked poker hands.

A \$100.00 deposit X 20% = \$20 worth of bonus dollars you qualify for as a first time depositor.

\$20 dollar bonus X 5 = 100 raked hands.

So, once you have finished playing 100 raked hands, the online poker site will deposit 20 dollars in to your account just for playing poker.

- You can always withdraw your initial deposit before you finish the 100 raked hands, but if you do this, you will not get your bonus.

Currently, there are hundreds of online poker sites available to play almost every type of poker imaginable.

Most poker sites are part of large poker networks. When you begin to play, you will start at the [BankrollMob](#) website, which is an important step to building your bankroll.

BankrollMob will provide you with additional gifts and bonuses that are essential for building your bankroll.

If you just go to a poker website without a [BankrollMob](#) referral and sign up, you will miss out on all of these extra bonus opportunities.

After you select the poker site from the BankrollMob site you will need to install the poker software on your computer.

Most poker software has easy to follow step-by-step instructions which will walk you through the installation process. You only need to supply your basic information like name, address, and phone number, then create a poker site username and password.

There's no need to use a credit card.

After you start to build up your bankroll, you will need a way to efficiently move your poker bankroll around. Though you can request that a check be mailed that would take too much time.

I recommend an online money transfer service, such as Neteller.com or Moneybookers.com.

Neteller functions like an online wallet, where you are able to deposit, withdraw, and transfer funds to the many merchants that support Neteller.

There are three different types of bonuses you can receive.

First Time Bonus (For New Users)

These are the best that the poker rooms have to offer; however, you can only use them once at each poker site.

Reload Bonuses (For Existing Users)

These are special offers that the poker rooms offer existing players. While these can be good offers, they are not as beneficial as the first time depositor bonuses. Additionally, first time deposit bonuses generally have easier release requirements.

Rake Rebate Plans

The 'rake' is the amount the poker room removes from each pot, as a fee, for hosting/offering the poker game. The amount taken from each pot varies by limits, but is generally anywhere from \$1-\$3 on average per hand.

- What is a rakeback?

When you sign up with a poker room through BankrollMob, you will receive a refund for every \$1.00 that you pay in rake. This refund is known as a rakeback.

No matter what limits you play, whether you are a professional or just play poker for fun, receiving a rakeback will greatly increase your win-rate, and allow you to make more money.

It works like this...

BankrollMob advertises poker sites and gets paid a percentage of total rake for each one of their players. BankrollMob then gives this payment from the poker room, in the form of a rakeback, back to you, the poker player.

BankrollMob currently has more than 70,000 members and pay out thousands of rake back dollars each month to their members. They offer new poker players up to 33% of rake back each month. These monthly rake rebate checks can help minimize the amount of rake taken from your poker bankroll. Over time using rake rack plans will help you grow your poker bankroll.

Here are some essential tips to become a successful poker player.

Always be patient!

Patience is the key to being a successful and profitable poker player. If you can't keep your cool at the tables, you will lose money fast.

The problem with most poker players is that they play way too many hands. They see poker as a “gambling game”, and want to play many cards/hands, because it is exciting to stay in the play.

They open with marginal starting hands, call bets on the flop and turn, chasing a draw, in the hope to make a winning hand at the final river.

That’s so wrong!

I admit that when I started playing poker online, I also did this. Sometimes my system worked, and my lousy hand turned into a winner at the end.

But in the long end, I lost money over and over again.

It was when I stopped playing like this, and concentrated on playing top hands only, betting aggressively, I started winning pots.

As a general rule, I suggest you see between 15% and 20% of the flop. It’s so very important to only play premium starting hands.

This means that most of the time you will fold, until you get dealt a great starting hand.

- Many poker sites provide a way for you to track your “flop seen” percentage. I recommend you use this feature in the poker software to track your play.

Folding many hands is a difficult concept for new poker players to understand, but the faster you believe that folding weak hands is critical to your poker success the more money you will make playing poker.

It’s simply the most important aspect of winning poker.

Fold, fold, and fold again until you are dealt a strong starting hand.

I can not stress enough that your success will depend upon playing only strong starting hands.

Strong starting hands in Texas Hold’em include high pocket pairs and ace valued cards with a high kicker (second card).

To learn more about starting hands, get this free Texas Hold’Em Ebook here:

<http://www.ebooks-made-easy.com/poker>

When its time to play, play aggressively!

Okay, you have waited for a long time to be dealt that pair of pocket aces, now it’s time to aggressively play those strong starting hands.

You need to raise pre-flop to get the most value out the hands that you play. Do not slow play your good hands. Always bet them!

You want to make other players fold pre-flop to make your hand even stronger with fewer players in the pot.

It's your goal to make other players believe that you only put money into the pot when you have a strong starting hand.

They will respect your patience and discipline and will think twice about bluffing you out of a pot. You can only create this type of poker imagine by playing strong starting hands.

Fine, you should now have a good understanding of online poker and be ready to begin the step-by-step process of building your poker bankroll.

I will show you how to maximize your poker profits by taking advantage of first time bonus opportunities, bonus reload offers, and affiliate rake rebate programs one poker website at a time.

First time sign-up bonuses are essential to making this system work and build your bankroll fast.

Bonus Reload offers are the core of this system and rake rebate programs will continue to add to your bankroll over the course of your poker career.

Online poker sites need you to fill their poker rooms, so they can rake a percentage of each pot.

By spreading your play between poker rooms, you will soon begin to receive reload bonuses that you can use over and over again.

In other words; you will become an expert in the art of online "poker room hopping". The profits that you make depend upon how much time you actually spend playing poker .

The more poker you play, the faster your bonuses will be released. It's that simple.

About Bankroll Management

Now, keep this in mind... You will not win every time you play poker.

This is a harsh fact that every poker player needs to completely understand. The one thing that will help you overcome losing sessions is good poker bankroll management.

Having enough of a poker bankroll to carry you through the bad sessions is critical to being a successful poker player.

There are many different theories or ratios that you can use.

The one that works best is a rack/bankroll ratio of four. If you play .50c- \$1.00 limit Hold'em, you will need at least \$160 dollars in the cashier and you will join a table with forty dollars to play with.

Why start at BankrollMob?

Online poker sites track how new players arrive to their websites and it is important to prove that [BankrollMob](#) is driving new customers to play online poker .

This, in turn, allows BankrollMob to negotiate better offers which ultimately are passed on to you.

The more business that is generated by BankrollMob, the better the offers the website can pass down to its players.

Earn 150 PartyPoints within 30 days and get another \$25 deposited from PartyPoker as well - for a total of \$50 free. To get the final \$50 bonus, you must earn another 250 PartyPoints within 90 days.

It's that simple...

Start playing poker to earn your points...

This is the fun part. You will have to play 400 Party Points to have your bonus dollars fully released. To minimize the chances of losing your free money I suggest you play .25/0.50 or .50/\$1.00 limit Texas Hold'em.

Play extremely tight, aggressive poker. At a minimum you are looking to win enough hands to cover your blinds. Let's say you make \$20 dollars in poker profits from playing these 500 raked hands.

- Original poker bankroll: **\$25** (given to you by BankrollMob)
- Profit from playing the minimum 150 PartyPoints: **\$25.00**
- Bonus after playing next raked 250 PartyPoints: **\$50.00**
- **Your total Poker Bankroll: \$100.00**

At this point you have \$100.00 in your poker account. By following this system you have increased your poker bankroll from nothing to \$100.00.

Great Job!

Ok, now it's time to withdraw your poker money from Party Poker. You can withdraw your money to your credit card, but I recommend you open a Neteller account. [Click here](#) and register for an account.

Or you can use your Moneybookers account too. [Click here](#) to register an account.

BankrollMob will give you BankrollMob Points for every poker room you join as a new poker player. 5,000 BankrollMob Points equals \$50 dollars.

You can also use these points to purchase bonus offers from other poker rooms.

Reload Offers

Reload offers are used to reward existing poker players. If an existing poker player re-deposits money into a poker account during a reload promotion, the poker site offers additional bonus dollars.

You can move your poker bankroll back and forth between poker rooms and your Neteller or Moneybookers account to gain additional bonus dollars. Do this as many times necessary to build your bankroll up to at least \$500 dollars.

Most poker rooms offer a 20% first time deposit bonus, up to \$100 maximum bonus, with only a five to seven times raked hand release requirement.

By having a poker bankroll of \$500 dollars you are maximizing on your first time deposit bonus dollars. Also after you reach the \$500 dollar poker bankroll goal take a moment to congratulate yourself.

By following this system you have started with some free money and built it up 500%. A 500% return is a great achievement!
